PROFILE

Software Engineer with hands-on experience in building full-stack applications using **React.js**, **Python**, **Django**, and **REST/GraphQL APIs**. Experienced in developing scalable backend services, cloud-ready applications, and clean, maintainable code with strong problem-solving skills.

EXPERIENCE

Frontend Developer February 2026 – Present | Bengaluru, India
Net Ninja Solutions Pvt. Ltd.

- Developed and maintained the **Crack The Campus** EdTech platform using **React.js**, **TypeScript**, **Tailwind CSS**, **Django**, and **PostgreSQL**.
- Led the migration of the platform's frontend to **Tailwind CSS**, improving UI consistency, maintainability, and development efficiency.
- Designed and developed **contest pages**, student engagement modules, and interactive user experiences for the platform.
- Built and integrated a **Spin the Wheel** feature to increase student participation and engagement during campaigns and events.
- Developed and deployed a live **Contact Us** system with backend integration for efficient lead and inquiry management.
- Implemented **pagination, filtering, and dynamic data rendering** to improve performance and user navigation across large datasets.
- Worked with **PostgreSQL databases**, assisting in data management, query handling, and backend data integration.
- Redesigned and enhanced the **Pricing Page** and other corporate website pages to improve user experience and visual hierarchy.
- Performed extensive **UI bug fixes**, layout optimizations, and responsive design improvements across the platform and corporate website.
- Optimized frontend performance by removing unnecessary **Framer Motion** animations, reducing UI delays and improving page responsiveness.

Full Stack Engineer September 2025 – January 2026 | Bengaluru, India
ShopTrade (Shopify Premier Agency)

- Developed UI components in **React.js** to manage quotation content, including plain text and logo widgets with toggle functionality.
- Designed and implemented Draft Order models and **serializers** using **Django Framework**, including taxation logic using **Python**.
- Implemented **GraphQL-based data mutations and queries** for modular, service-oriented frontend-backend communication.
- Built modal-based **CRUD** functionality using **GraphQL mutations** to update customer details and address information with strict validations and **PostgreSQL** database integration.
- Implemented file attachment functionality in Draft Orders using **Polaris Dropzone** to upload images and documents.
- Developed interactive UI features such as toggle effects for share and option buttons to improve user experience.
- Identified and resolved UI layout and alignment issues in customer dropdowns and related components.
- Worked on Shopify **Theme App Extensions**, including **app embed** configuration, deployment, and integration within the Shopify admin.

Web Developer Intern December 2024 – March 2025 | Remote
Calanjiyam Consultancies and Technologies

- **Worked on developing a comprehensive bookkeeping application dashboard** that streamlines financial management, utilizing **HTML**, **CSS**, **JavaScript**, and **PHP** to create a responsive user interface and robust backend functionality for managing income and expenses.
- **Implemented user authentication** features, including **real-time updates**, **pagination**, and **filtering** options, using SQL Knowledge.
- Applied UI/UX best practices to enhance user workflows and interactions in both admin dashboards and customer-facing pages.

EDUCATION

Bachelor of Technology - Computer Science & Engineering (GPA - 8.4/10) July 2019 – 2023 | Jamshedpur, IN
Arka Jain University

PROJECTS

AI-Squad 
Developed a responsive and visually rich website of an AI-focused company using React.js, HTML, CSS, and JavaScript. Built complex UI components from scratch and ensured seamless functionality across all screen sizes.

- Integrated modern design principles to enhance user experience and interface appeal
- Deployed the site using **Vercel** for fast and scalable hosting
- Utilized **Git** and **GitHub** for version control and project management

iTask 
An app to Manage your TO DO's

- I built a responsive To-Do app using **HTML**, **Tailwind CSS**, **React**, and **JavaScript** that lets users add, edit, delete, and mark tasks as complete.
- It uses **Async Storage** / **local storage** to persist tasks, ensuring data remains saved even after page refresh.

SKILLS

Programming Languages: Javascript, Typescript, Python
Web Tech: HTML, CSS, React Js, REST API, Django, GraphQL API, Tailwind CSS
Databases: PostgreSQL, SQL
Tools & Deployment: GitHub, Google cloud, ChatGPT, Cursor, Vercel, Ngnix

CERTIFICATES & ACHIEVEMENT

- React Development Bootcamp By Angela Yu
- Algorithmic Toolbox by UC San Diego
